GAURAV RAYAT

📞9560320313 | ✉ gaurav.rayat2004@gmail.com | linkedin/in/gaurav-rayat | github.com/GAURAV-RAYAT | gauravrayat.me
📍New Delhi, INDIA

Data Science and Mathematics undergraduate with a strong foundation in machine learning, SQL, and Python. Skilled at deriving actionable insights from complex datasets, supported by hands-on experience in real-world projects and internships. Achieved an impressive GATE 2025 qualification with an All India Rank of 2177 in Data Science and Artificial Intelligence, showcasing analytical expertise and commitment to excellence.

EDUCATIONAL QUALIFICATION

Name of Course	Year	School/College	Grade
B.Sc. (H) Mathematics	2026	Sri Venkateswara College, University of Delhi	7.24
DIPLOMA in Data Science (Online)	2026	Indian Institution of Technology, Madras	8.09
AISSCE (Class XII)	2022	Deepalaya School, South Delhi	91.6%
AISSE (Class X)	2020	Deepalaya School, South Delhi	87.6%

WORK EXPERIENCE

DATA SCIENCE INTERN, INTELLIMARK.AI (Sept 2025 - Nov 2025)
- *Worked on an automated time-series forecasting pipeline using statistical and ML models (Holt-Winters, SARIMA, Prophet, XGB, LGBM, RF) to predict monthly quantities across multiple businesses.*
- *Analysed model outputs by summarising predictions, benchmarking them against actuals, and visualising results through clear comparison plots.*

DATA ANALYST INTERN, QBE Consulting (April 2025 - July 2025)

DATA SCIENCE INTERN, Unified Mentor (September 2024 - October 2024)
- *Spearheaded the development of two end-to-end machine learning models using Python and Scikit-learn.*
- *Performed feature engineering and cross-validation techniques to improve model accuracy and generalizability.*

CHATBOT DEVELOPMENT INTERN, Summer Research Internship, Sri Venkateswara College (July 2024 - September 2024)
- *Co-developed an intelligent chatbot using Python and ML techniques, designed to handle dynamic user queries in real-time.*
- *Conducted data cleaning and visualization to optimize NLP pipeline performance, enhancing response quality by 20%.*

DATA ANALYST INTERN, Studify Success (March 2024 - June 2024)
- *Automated data workflows and built custom dashboards by integrating advanced MySQL queries with Python analytics scripts.*
- *Developed predictive ML models using Scikit-learn to drive student performance insights, reducing manual analysis effort by 60%.*

PROJECTS

Spam Message Detection Web App (May 2025 - June 2025)
- Built an interactive web application using Streamlit to classify text messages as spam or not spam.
- Leveraged machine learning for real-time predictions and utilized Scikit-learn for model training and Joblib for model serialization.
- Employed a TF-IDF Vectorizer for feature extraction and Integrated an intuitive user interface for seamless interaction—enhanced functionality through clear and actionable insights for message evaluation.

  CODE: ***https://github.com/GAURAV-RAYAT/spam_detection***

Iris Flower Classification using SVM and Streamlit (May 2025 - June 2025)
- Built an end-to-end Machine Learning web application to classify iris flower species using Support Vector Machine (SVM). Leveraged the Iris dataset from scikit-learn to train the model, applying preprocessing with StandardScaler, and evaluated using the accuracy score. The trained model was deployed using Streamlit, allowing users to input flower measurements (sepal/petal length and width) and receive real-time species predictions.

  CODE: **https://github.com/GAURAV-RAYAT/iris_flower_classification**

Telegram Chatbot (Generative AI) (July 2024 - September 2024)
- Developed a conversational AI bot using Flask, Bolt IoT AI, and Aiogram, integrated with OpenAI's GPT-3.5 API.
- Enabled intelligent, human-like responses on Telegram, simulating a virtual assistant experience.

  CODE: ***https://github.com/GAURAV-RAYAT/Srivipra_chatbot***

Housing price prediction in Delhi (Machine Learning) (September 2023 - December 2023)

To identify the best-performing machine learning model for a dataset through comprehensive data analysis and model comparison.
- *Performed deep exploratory data analysis (EDA) and model benchmarking, achieving high R^2 and low MAE scores.*
- *Built a robust ML pipeline to forecast property prices based on real-world features using Linear Regression and Decision Tree Regressor.*

  CODE: ***https://github.com/GAURAV-RAYAT/property_price_prediction***

Skills

Programming Languages
Python (Advanced), SQL (Advanced)
Frameworks & Libraries:
NumPy (Advanced), Pandas (Advanced), Scikit-learn (Advanced), Seaborn (Advanced), Matplotlib (Advanced), SciPy, Flask (Advanced), Django (Basic), Jinja2
Tools & Platforms:
MySQL (Advanced), PostgreSQL, SQLite3, Git & GitHub (Advanced), Linux (Advanced), Shell Scripting (Bash), APIs, Qt Studio, Tableau (Basic), HTML, CSS
Core Concepts & Coursework:
Advanced DBMS, Machine Learning Algorithms (Advanced), Neural Networks, Data Structures & Algorithms in Python (Advanced), Exploratory Data Analysis (Advanced), Business Analytics (Intermediate), Statistics, Calculus, Linear Algebra, Modern Application Development, Artificial Intelligence

Certifications & Online Courses

INTERNSHALA CERTIFICATIONS: Building Generative AI (92%) LINK | Business Analytics (82%) LINK | Programming with Python (76%) LINK | Data Science (75%) LINK | Natural Language Processing (68%) LINK | Machine Learning (61%) | LINK
